

methylation distance on promoters

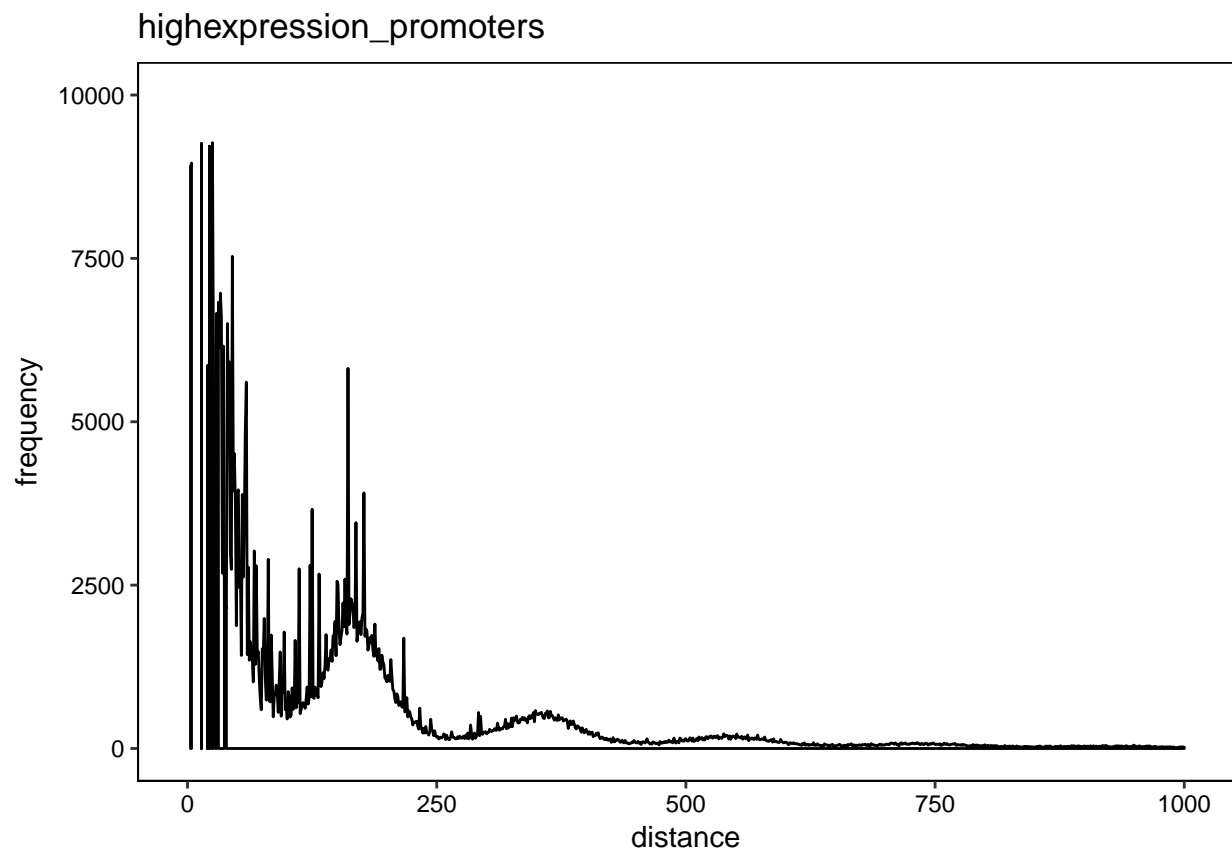

isaclee

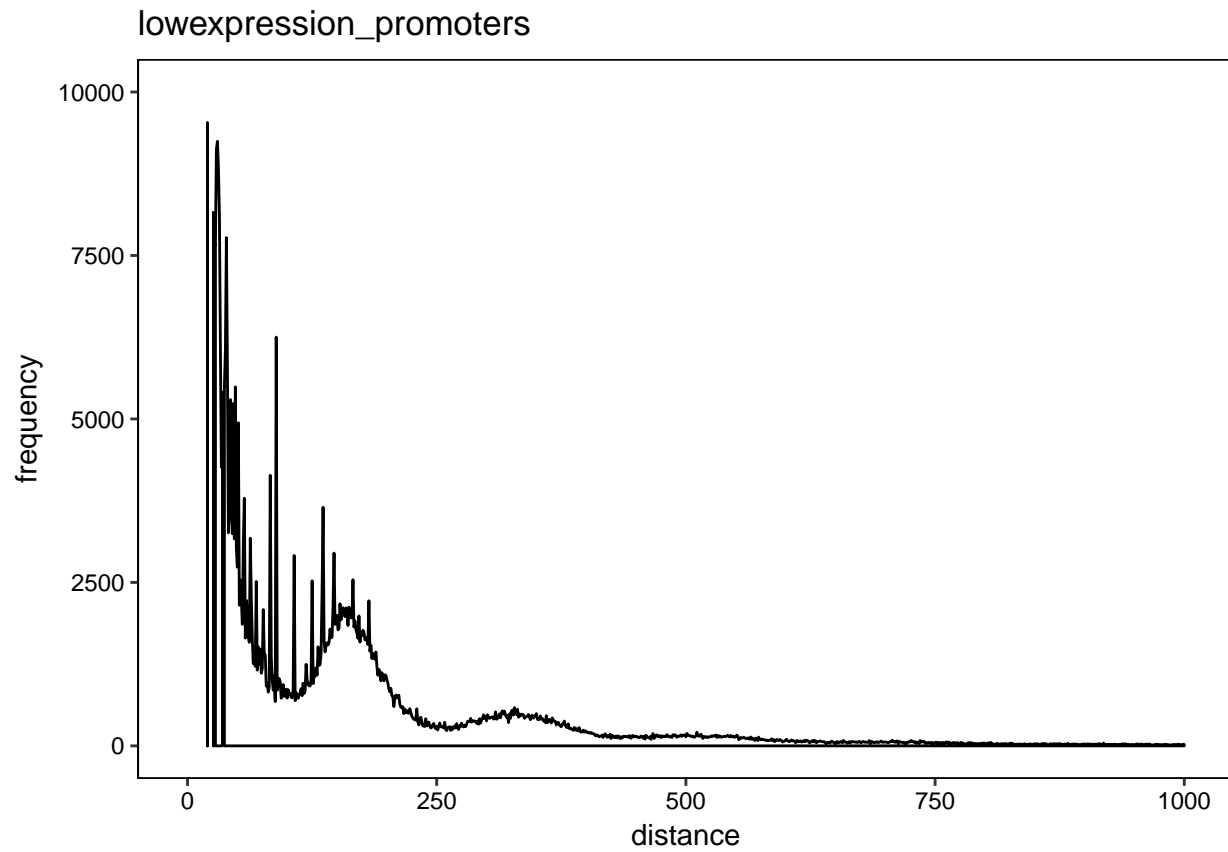

5/6/2019

write out the names of high vs low expression genes

subset gene windows by expression

get distances between open marks

```
## # A tibble: 2 x 3
## # Groups:   regname [2]
##   regname      region dist
##   <chr>         <chr> <dbl>
## 1 highexpression_promoters all    108.
## 2 lowexpression_promoters all     92.6

## # A tibble: 2 x 3
##   regname      median mean
##   <chr>         <dbl> <dbl>
## 1 highexpression_promoters  149.  157.
## 2 lowexpression_promoters  102.  117.
```
